

POLICY ON INTEGRATED MANAGEMENT

Mantek Manufacturing Ltd design, develop and manufacture seals and custom mouldings and supply standards based seals, gaskets and industrial products. We operate an integrated management system that incorporates Health and Safety and quality and environmental criteria defined in the international standards ISO9001 and ISO14001.

As an organisation Mantek Manufacturing Ltd are committed to providing the appropriate financial and technical resources needed to ensure the effective management of the environment, health and safety, and quality. This includes:

- Ensuring all relevant legal and other requirements are identified and complied with.
- Assessing and managing risks related to the health safety and welfare of employees and visitors.
- Setting and monitoring improvement objectives against quality and environmental criteria.
- Setting realistic targets to reduce the significance of environmental impacts using a structured and properly managed programme that will demonstrate continual improvement.
- Reviewing processes and activities in order to determine impacts on the environment and implementing controls and disciplines to ensure significant impacts are minimised
- A commitment to manage activities to ensure prevention of pollution and to reduce significant aspects of resource use and waste utilising the waste hierarchy ie Reduce, Reuse, Recycle.
- Implementing controls that will assure the quality of processes and meet the stated and implied needs of internal and external customers.
- Developing partnership programmes with customers, suppliers, employees and the community in order to manage environmental aspects and improve communication.

Mantek Manufacturing Ltd are committed to the continual improvement of the integrated management system and the benefit this will have to the stakeholders of the business. This policy is communicated to all persons working on behalf of Mantek Manufacturing Ltd and is publicly available via our website www.mantek.co.uk.
